## PROFESSIONAL SUMMARY

Full-stack software engineer with hands-on experience building responsive web applications, RESTful APIs, and native mobile apps. Skilled across JavaScript/TypeScript, React and Next.js, with growing expertise in Android (Kotlin) and AWS cloud services (Lambda, DynamoDB, API Gateway). Finished my B.S. in Software Engineering while shipping deployed projects from concept through production. Known for translating business requirements into clean, maintainable code and for a track record of measurable business impact.

## TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Kotlin, Python, SQL, CSS

Frameworks & Libraries: React.js, Next.js, Tailwind CSS, Node.js

Cloud & Backend: AWS (Lambda, DynamoDB, API Gateway), RESTful API design, Docker

Tools & Practices: Git/GitHub, Bun, Visual Studio Code, Agile & Waterfall methodologies, Web Scraping (Puppeteer)

## PROJECTS

---

### KC Transit Reliability Tracker – Full-Stack Geospatial App | *Personal Project* In Progress

- Building a full-stack app that ingests Kansas City Area Transportation Authority (RideKC) GTFS and GTFS-Realtime data to measure route and stop reliability over time.
- Designing a PostgreSQL/PostGIS data model with versioned migrations, an idempotent GTFS loader, GeoJSON API endpoints, and a Next.js/MapLibre interactive map of the transit network, all containerized with Docker.

### GitHub Wrapped – Full-Stack Next.js App | *Personal Project* September 2026

- Built and deployed a full-stack Next.js 16 / React 19 web app that turns any GitHub account's yearly activity into a shareable, swipeable year-in-review, sourced from a single GitHub GraphQL query.
- Built the stats engine that consists of contribution streaks, language breakdown, 53-week heatmap, and a developer-persona classifier, unit-tested functions (~49 tests) with Recharts visualizations.
- Added request-time Open Graph share images via next/og and an Upstash Redis cache with per-IP, sliding-window rate limiting (Next.js middleware) to protect third-party API quotas.

### Expense Approval Workflow – WGU Capstone | *Western Governors University* August 2026

- Architecting a native Android expense-approval application in Kotlin backed by a serverless AWS stack (Lambda, DynamoDB, API Gateway).
- Authored full Waterfall-methodology project documentation, including scope, requirements, and system design specifications.

## EDUCATION & CERTIFICATIONS

---

### B.S., Software Engineering | *Western Governors University* 2023 – 2026

Google IT Support Professional Certificate — Coursera, 2023

CompTIA Project+ — CompTIA, 2024

AWS Cloud Foundations — Alpine Testing Solutions / AWS, 2025 – 2028
